This updated Seminar Study provides an overview of the process of British decolonisation. The eclipse of the British Empire has been one of the central features of post-war international history. At the end of the Second World War the empire still spanned the globe and yet by the mid-1960s most of Britain's major dependencies had achieved independence. Concisely and accessibly, the book introduces students to this often dramatic story of colonial wars and emergencies, and fraught international relations. Although a relatively recent phenomenon, the end of the British Empire continues to spawn a lively and voluminous historical debate. Dr. White provides a synthesis of recent approaches, specially updated and expanded for this edition, by looking at the demise of British imperial power from three main perspectives: the shifting emphases of British overseas policy; the rise of populist, anti-colonial nationalism; the international political, strategic, and economic environment dominated by the USA and the USSR. The book also examines the British experience within the context of European decolonisation as a whole. Supporting the text are a range of useful tools, including maps, a chronology of independence, a guide to the main characters involved, and an extensive bibliography (specially expanded for the new edition). Decolonisation: the British Experience since 1945 is ideal for students and interested readers at all levels, providing a diverse range of primary sources and the tools to unlock them.

Combining an analysis of the ideas and policies that governed the British experience of decolonisation and shows how the British political tradition was integral to the way in which the empire was regarded as being transformed rather than lost.

An authoritative political history of one of the world's most important empires on the road to decolonisation. Ronald Hyam's 2007 book offers a major reassessment of the end of empire which combines a study of British policymaking with case studies on the experience of decolonization across Africa, Asia and the Caribbean. He describes the dysfunctional policies of an imperial system coping with postwar, interwar and wartime crises from 1918 to 1945 but the main emphasis is on the period after 1945 and the gradual unravelling of empire as a result of international criticism, and the growing imbalance between Britain's capabilities and its global commitments. He analyses the transfers of power from India in 1947 to Swaziland in 1968, the major crises such as Suez and assesses the role of leading figures from Churchill, Attlee and Eden to Macmillan and Wilson. This is essential reading for scholars and students of empire and decolonisation.

This Seminar Studies title is a succinct study of modern British foreign policy, focusing on the period from 1945 to the present day. Since the end of the Second World War, Britain has been engaged in international conflicts from the Suez Crisis to the Gulf War and has actively sought involvement in transnational and global affairs. Starting with a brief overview of the rise and fall of the British Empire and continuing chronologically with detailed chapters covering the second half of the twentieth century and the beginning of the twenty-first, Alasdair Blair discusses the highs and lows of British foreign policy in an accessible yet analytical manner. Dealing with themes such as the issues triggered by decolonisation and the changing relationship between Britain and Europe, this text considers the pivotal moments in modern Britain's engagement with the wider world. Included in this title are supporting materials, such as a chronology of important events from 1945, a Who's Who of key government figures and a collection of relevant primary sources. Thorough yet concise, *Britain and the World since 1945* is the ideal resource for students interested in the development of British foreign policy.

Although Britain's formal imperial role in the smaller, oil-rich sheikdoms of the Arab Gulf – Kuwait, Bahrain, Qatar and the United Arab Emirates – ended in 1971, Britain continued to have a strong interest and continuing presence in the region. This book explores the nature of Britain's role after the formal end of empire. It traces the historical events of the post-imperial years, including the 1973 oil shock, the fall of the Shah in Iran and the beginnings of the Iran-Iraq War, considers the changing positions towards the region of other major world powers, including the United States, and engages with debates on the nature of empire and the end of empire. The book is a sequel to the authors' highly acclaimed previous books *Britain's Revival and Fall in the Gulf: Kuwait, Bahrain, Qatar, and the Trucial States, 1950-71* (Routledge 2004) and *Ending Empire in the Middle East: Britain, the United States and Post-war Decolonization, 1945-1973* (Routledge 2012).
