The purpose of the Great Reset is the imposition of a health dictatorship aiming at the imposition of liberticidal measures, hidden behind tempting promises of ensuring a universal income and cancelling individual debt. The price of these concessions from the International Monetary Fund will be the renunciation of private property and adherence to a program of vaccination against Covid-19 and Covid-21 promoted by Bill Gates with the collaboration of the main pharmaceutical groups.

"The Corona crisis and the Need for a Great Reset" is a guide for anyone who wants to understand how COVID-19 disrupted our social and economic systems, and what changes will be needed to create a more inclusive, resilient and sustainable world going forward. Thierry Malleret, founder of the Monthly Barometer, and Klaus Schwab, founder and executive Chairman of the World Economic Forum, explore what the root causes of these crisis were, and why they lead to a need for a Great Reset.Theirs is a worrying, yet hopeful analysis. COVID-19 has created a great disruptive reset of our global social, economic, and political systems. But the power of human beings lies in being foresighted and having the ingenuity, at least to a certain extent, to take their destiny into their hands and to plan for a better future. This is the purpose of this book: to shake up and to show the deficiencies which were manifest in our global system, even before COVID broke out.

We tend to view prolonged economic downturns, such as the Great Depression of the 1930s and the Long Depression of the late nineteenth century, in terms of the crisis and pain they cause. But history teaches us that these great crises also represent opportunities to remake our economy and society and to generate whole new eras of economic growth and prosperity. In terms of innovation, invention, and energetic risk taking, these periods of "creative destruction" have been some of the most fertile in history, and the changes they put into motion can set the stage for full-scale recovery. In The Great Reset, bestselling author and economic development expert Richard Florida provides an engaging and sweeping examination of these previous economic epochs, or "resets." He distills the deep forces that have altered physical and social landscapes and eventually reshaped economies and societies. Looking toward the future, Florida identifies the patterns that will drive the next Great Reset and transform virtually every aspect of our lives — from how and where we live, to how we work, to how we invest in individuals and infrastructure, to how we shape our cities and regions. Florida shows how these forces, when combined, will spur a fresh era of growth and prosperity, define a new geography of progress, and create surprising opportunities for all of us. Among these forces will be * new patterns of consumption, and new attitudes toward ownership that are less centered on houses and cars * the transformation of millions of service jobs into middle class careers that engage workers as a source of innovation * new forms of infrastructure that speed the movement of people, goods, and ideas * a radically altered and much denser economic landscape organized around "megaregions" that will drive the development of new industries, new jobs, and a whole new way of life We've weathered tough times before. They are a necessary part of economic cycles, giving us a chance to clearly see what's working and what's not. Societies can be reborn in such crises, emerging fresh, strong, and refocused. Now is our opportunity to anticipate what that brighter future will look like and to take the steps that will get us there faster. With his trademark blend of wit, irreverence, and rigorous research and analysis, Florida presents an optimistic and counterintuitive vision of our future, calling into question long-held beliefs about the nature of economic progress and forcing us to reassess our very way of life. He argues convincingly that it's time to turn our efforts — as individuals, as governments, and as a society — to putting the necessary pieces in place for a vibrant, prosperous future.

This book is meant to be a neutral analysis and depiction of threats to world leaders, big tech elites, Silicon Valley, conservatives, liberals, WEF, nation states, the intelligence community, and the common person. This includes religious people and atheists. I attempt to write on everyone's behalf, less one entity, the regime of China. I will describe the Great Reset (4th industrial revolution) more in detail from the macro perspective with short and concise summary paragraphs of each major global component as it relates to AI, smart cities, and the geo-political challenges that exist.I will go a lot further and beyond what the World Economic Forum has published and is disclosing to the public with Mr. Klaus Schwab's own book, COVID 19: The Great Reset, which shined may be 5% of what I will disclosed in my previous book Artificial Intelligence Dangers to Humanity, and what I will be disclosing here, in this book. This book will show you the macro picture, (The Global 40,000 Feet View) which for most people should be sufficient to understand the grand picture and every major interconnected part. In this analysis, I will introduce ideas and threats that the World Economic Forum, Klaus Schwab (Founder of WEF), Silicon Valley and governments have not analyzed in their entirety as whole, with a focus on China CCP and A.I.I accurately predicted, published, and warned about the COVID 19 (CCP Virus) from China, lockdown, the Great Reset and 1000s of interconnected events and threats in 2019, prior to their occurrence on the world stage. The analysis in this book is derived from compressing the data, experience, Secret Service/Government reports, and intel from Cyrus A. Parsa, and The AI Organization's network of intelligence.

A concise and authoritative survey of the political and economic debate around Tony Blair's 'Big Idea' of stakeholding by leading exponents and their critics on both Left and Right. The book summarises and criticises the key stakeholder arguments as these have been applied to the economy and to society. The book seeks to identify what is new in the concept of stakeholding, and whether it can provide the organising idea and strategic direction for a reformist government to regain the initiative in the battle of political ideas for the New Right.

World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future--one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

From Richard Florida, author of the bestselling books The Rise of the Creative Class and Who 's Your City?, comes a book that frames the economic meltdown of 2008–09 not as a crisis but as an opportunity to " reset. " In doing so, he paints a fascinating picture of what our economy, society, and geography will look like—of how we will work and live—in the future.

The next big disruption.... ..will change humanity forever. Are you ready for the Great Reset? In 2020, we learned that the entire population can be impacted by a single event. It changed our lives. The markets plummeted, for a while, and some knew how to be on the winning side of that dip. Every country on Earth seemed vulnerable. Was anyone prepared? The billionaires had a plan. Learn what Elon Musk, Jeff Bezos, Peter Thiel, Marc Cuban and Larry Ellison were doing to prepare financially. They have another secret, too. They want to extend life expectancy. Can we live for centuries? Yes, and the wealthy are determined to unlock those mysteries. They're investing heavily in research and uncovering breakthrough advances. We can use their insights to figure out our own course. You'll learn about: - Cryptocurrency (Bitcoin and others) - NFT's and Blockchain - Diamonds, Gold, Silver, and Rare Coins - The future of Artificial Intelligence - Anti-Aging technology - Wealth Building and Management. - Health and Medicine - Political realities - and much more If the U.S. dollar collapses or the next world-wide health crisis begins, then time will be short. You must be informed and have a strategy to survive. Better than that, this book will help you thrive. In an uncertain future.....the Great Reset may be the best opportunity you'll ever find. You'll love this extensive resource, because it has all the explanations, graphs, and images you'll need to fully understand where society is headed. Get it now.

Amid the turmoil in the Eurozone, economic problems in Russia, stagnation in Japan, and rumblings that China may slip into recession, the one reliable asset is the American dollar. While it may encounter ups and downs, investors for decades have been confident that it will never lose a substantial part of its value. That may be about to change. In The Big Reset, Willem Middelkoop lays out the case for an inevitable monetary reset, one that will be designed to keep the United States in the driver's seat, but will include strong roles for the Euro and China's Renminbi--and, crucially, gold. This fully revised edition of Middelkoop's book takes into account developments since its original publication, which have only strengthened the case for the coming return of gold.

The Great Reset is a riveting and detailed view of the current financial atrocity and the economic path of a continent that is in the process of playing its last hand as a global leader. In a detailed and critical assessment of the global economic state, The Great Reset courageously challenges the rhetoric of the financial media. The Great Reset openly reveals the entangled web of the financial world and government and their plan to continue their personal objectives at the demise of the masses. The economic path currently being driven by an elite group of financial decision makers will affect the decisions made in the boardroom of big business and the living rooms of everyday investors. This is a must read for business leaders and those consumers invested in the global markets, to better understand the basis of the crisis and the future that is being determined by the policy enactments and decisions of global governments. The Great Reset provides critical guidance to anyone planning their economic or corporate future and will shape your views and provide a clear assessment of the current business climate and how to move forward in this economy.

A great new title from Regnery Publishing, the leader in conservative books since 1947.
